1 Removal and replacement

- [Removal and replacement strategy](#)
- [Service approach](#)
- [Removal and replacement procedures](#)

Removal and replacement strategy

 **WARNING!** Turn the product off, wait 5 seconds, and then remove the power cord before attempting to service the product. If this warning is not followed, severe injury can result, in addition to damage to the product. The power must be on for certain functional checks during problem solving. However, the power supply should be disconnected during parts removal.

Never operate or service the product with the protective cover removed from the laser/scanner assembly. The reflected beam, although invisible, can damage your eyes.

The sheet-metal parts can have sharp edges. Be careful when handling sheet-metal parts.

 **CAUTION:** Do not bend or fold the flat flexible cables (FFCs) during removal or installation. Also, do not straighten pre-folds in the FFCs. You *must* Make sure that all FFCs are fully seated in their connectors. Failure to fully seat an FFC into a connector can cause a short circuit in a PCA.

 **NOTE:** To install a self-tapping screw, first turn it counterclockwise to align it with the existing thread pattern, and then carefully turn it clockwise to tighten. Do not overtighten. If a self-tapping screw-hole becomes stripped, repair the screw-hole or replace the affected assembly.

Electrostatic discharge

 **CAUTION:**  Some parts are sensitive to electrostatic discharge (ESD). Look for the ESD reminder when removing product parts. Always perform service work at an ESD-protected workstation or mat. If an ESD workstation or mat is not available, ground yourself by touching the sheet-metal chassis *before* touching an ESD-sensitive part.

Protect the ESD-sensitive parts by placing them in ESD pouches when they are out of the product.

Required tools

- #2 Phillips screwdriver with a magnetic tip and a 152 mm (6 in) shaft length
- Small flatblade screwdriver
- Needle-nose pliers
- ESD mat (if one is available) or ESD strap
- Penlight (optional)

CAUTION: Always use a Phillips screwdriver (callout 1). Do not use a Pozidriv® screwdriver (callout 2) or any motorized screwdriver. These can damage screws or screw threads.

Figure 1-1 Phillips and Pozidriv screwdriver comparison

CAUTION: Avoid pulling directly on wires to disconnect wire-harness connectors. Pull on the plastic body of a connector to avoid damaging the connector wires.

Types of screws

WARNING! Make sure that components are replaced with the correct screw type. Using the incorrect screw (for example, substituting a long screw for the correct shorter screw) can cause damage to the product or interfere with product operation. Do not intermix screws that are removed from one component with the screws that are removed from another component.

For a complete list of screw types and part numbers, see the Parts chapter.

Service approach

Before performing service

- Remove all paper from the product.
- Turn off the power using the power switch.
- Unplug the power cable and interface cable or cables.
- Place the product on an ESD workstation or mat, or use an ESD strap (if one is available). If an ESD workstation, mat, or strap is not available, ground yourself by touching the sheet-metal chassis *before* touching an ESD-sensitive part.

- Remove the toner cartridge.
- Remove the Tray 2 cassette.

After performing service

- Plug in the power cable.
- Reinstall the toner cartridge.
- Reinstall the Tray 2 cassette.
- Load paper in the product.

Post-service test

Perform the following test to verify that the repair or replacement was successful.

Print-quality test

1. Verify that you have completed the necessary reassembly steps.
2. Make sure that the tray contains clean, unmarked paper.
3. Attach the power cord and interface cable or interface cables, and then turn on the product.
4. Verify that the expected startup sounds occur.
5. Print a configuration page, and then verify that the expected printing sounds occur.
6. Print a demo page, and then verify that the print quality is as expected.
7. Send a print job from the host computer, and then verify that the output meets expectations.
8. Clean the outside of the product with a damp cloth.

Parts removal order

Use the following diagram to determine which parts must be removed before removing other parts.

Figure 1-2 Parts-removal order

Component	Remove	Remove	Remove	Remove	Remove	Remove	Remove	Remove
Toner cartridge								
Tray 2 cassette								
Tray 1 pickup roller								
Tray 1 separation pad	Left cover							
Tray 1 pickup gear assembly	Left cover							
Tray 2/3 pickup roller	Tray 2/3 cassette							
Tray 2/3 separation roller	Tray 2/3 cassette							
Document feeder pickup rollers								
Document feeder separation pad

Optional paper feeder right cover								
Optional paper feeder driver PCA	Tray 3 right cover							
Optional paper feeder paper sensor PCA	Tray 3 right cover							

Removal and replacement procedures

Rollers

Multipurpose (MP) tray pickup roller

1. Open the toner cartridge door, and then remove the toner cartridge.
2. Pull back and hold the pickup roller cover (callout 1), press the tabs (callout 2) on both ends of the pickup roller away from the roller — which should cause the roller to move up — and then remove the roller.

Figure 1-3 Remove the MP tray roller

Multipurpose (MP) tray separation pad

To remove the separation pad, you must first remove the pickup roller assembly.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
2. Open the toner cartridge door, and then remove the toner cartridge.

3. On the left side of the product, release the tab (callout 1) at the center of the gear, and then remove the gear (callout 2).

 **NOTE:** The gear is composed of two pieces. Releasing the outer tab does not remove the entire gear assembly and exposes an internal spring in the gear.

Figure 1-4 Remove the MP tray separation pad (1 of 5)

 **Reinstallation tip** Press and hold back the gear arm (callout 3) when reinstalling the pickup gear.

4. In the toner cartridge cavity, pull back the pickup roller cover, and then use a small flat-blade screwdriver to release the tab (callout 1) on the pickup roller shaft.

Figure 1-5 Remove the MP tray separation pad (2 of 5)

5. Move the pickup roller shaft to the left to free the right end of the shaft from the holder, and then remove the pickup roller shaft assembly to expose the separation pad.

Figure 1-6 Remove the MP tray separation pad (3 of 5)

 **Reinstallation tip** The spring at the right end of the shaft is not captive and might fall off during this process. Make sure that the spring is positioned correctly when reinstalling, as shown in the following figure.

Figure 1-7 Remove the MP tray separation pad (4 of 5)

6. Pull up on the top edge of the separation pad to release it from the product.

Figure 1-8 Remove the MP tray separation pad (5 of 5)

 **Reinstallation tip** When reinstalling the pickup roller shaft assembly, make sure that the flat part of the pickup roller is directly over the separation pad.

Tray 2 and optional Tray 3 pickup roller

1. Remove the tray cassette from the product.
2. Locate the pickup roller at the top of the cassette cavity. On the left roller holder, release the tab (callout 1), and then turn the holder away from you.

Figure 1-9 Remove the Tray 2 or Tray 3 pickup roller (1 of 2)

3. Push the pickup roller to the left to release the right side roller, and then pull the roller out of the product.

Figure 1-10 Remove the Tray 2 or Tray 3 pickup roller (2 of 2)

Tray 2 and optional Tray 3 separation pad

1. Remove the tray cassette from the product.
2. Locate the separation pad at the front of the cassette. On the separation pad, remove two screws (callout 1), and then remove the pad from the tray cassette.

Figure 1-11 Remove the Tray 2 or Tray 3 separation pad

Document feeder rollers

1. Open the document feeder cover.

Figure 1-12 Remove the document feeder rollers (1 of 2)

2. On the underside of the document feeder cover, use a small flat-blade screwdriver to release the tabs (callout 1) on the left side of each roller, and then pull the rollers out of the cover.

Figure 1-13 Remove the document feeder rollers (2 of 2)

Document feeder separation pad

1. Open the document feeder cover.

Figure 1-14 Remove the document feeder separation pad (1 of 2)

2. Locate the separation pad at the end of the document feeder input tray, press down on the pad, and then slide the pad toward the input tray to remove it from the assembly.

Figure 1-15 Remove the document feeder separation pad (2 of 2)

Covers, scanner assembly, and control panel

Left cover

NOTE: No tools are necessary to remove this cover. However, a small flat-blade screwdriver might be helpful in releasing some of the tabs that hold the cover to the product chassis.

1. Remove the Tray 2 cassette.
2. Open the toner cartridge door and the rear jam access door.
3. Grasp the front edge of the cover, and then pull the cover toward the front to release four of the seven tabs (callout 1), and then release the two tabs at the top of the cover.

Figure 1-16 Remove the left cover

4. With the top and front edges loose, tip the top of the cover away from the product and then carefully slide the cover toward the back of the product to remove it.

Scanner assembly

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
2. Open the toner cartridge door and the rear jam access door.

3. On the left side of the product, remove the ground-wire screw (callout 1), disconnect one wire connector (callout 2) on the formatter, and disconnect two flat, flexible cables (callout 3) on the formatter.

Figure 1-17 Remove the scanner assembly (1 of 2)

Reinstallation tip Do not lose the two protective guides installed on the flat, flexible cables. Be sure to reinstall them when you reinstall the scanner assembly.

4. At the rear of the product, remove four screws (callout 1), and then slide the scanner toward the rear of the product to remove the assembly.

Figure 1-18 Remove the scanner assembly (2 of 2)

NOTE: The four scanner assembly screws removed in this step are a different size than the other screws used on the product. Set these screws aside to use when you reinstall the scanner assembly.

Control panel

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
2. Open the toner cartridge door and the rear jam access door.
3. On the rear of the control panel, remove the cable cover (callout 1), disconnect one flat, flexible cable (callout 2), and then pull back the flat, flexible cable.

Figure 1-19 Remove the control panel (1 of 3)

4. In the cavity behind the control panel, remove two screws (callout 1)

Figure 1-20 Remove the control panel (2 of 3)

5. Pull the top of the control panel assembly away from the product to release the tab (callout 1) at the back of the assembly, and then pull the control panel away from the product.

Figure 1-21 Remove the control panel (3 of 3)

Right cover

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
2. Open the toner cartridge door and the rear jam access door.
3. Grasp the rear edge of the cover and pull that edge toward the rear to release the four tabs (callout 1) on the rear edge of the cover, and then use a small flat-blade screwdriver to release the tab (callout 2) at the top edge of the cover.

Figure 1-22 Remove the right cover

4. With the back and top edges loose, carefully slide the cover toward the front of the product, and then remove it.

Top cover

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
2. Open the toner cartridge door and the rear jam access door.
3. On the left side of the product, disconnect one flat, flexible cable (callout 1) from the formatter.

Figure 1-23 Remove the top-cover assembly (1 of 3)

4. On the right side and the rear of the product, remove three screws (callout 1).

Figure 1-24 Remove the top-cover assembly (2 of 3)

5. On the top-cover assembly, remove four screws (callout 1).

Figure 1-25 Remove the top-cover assembly (3 of 3)

6. Lift the top-cover assembly off of the product to remove it.

Rear cover, rear door, and feed assembly

⚠ CAUTION: The fuser can be hot while the product is in use. Wait for the fuser to cool before working in that area.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
2. Open the toner cartridge door and the rear jam access door.
3. At the front of the product, in the Tray 2 cassette cavity, pull down on the green duplex-paper-feed-assembly release tab (callout 1), and then lower the assembly (callout 2).

Figure 1-26 Remove the rear cover, rear door, and feed assembly (1 of 3)

4. At the rear of the product, remove five screws (callout 1), release one tab (callout 2) near the bottom corner, and release two tabs (callout 3) from under the top cover assembly.

Figure 1-27 Remove the rear cover, rear door, and feed assembly (2 of 3)

5. Carefully separate the rear cover and rear door from the product, and then remove them.

 **NOTE:** The duplex-paper-feed assembly is removed with the cover and door

 **Reinstallation tip** When you reinstall the rear cover assembly, open the rear door to make sure that the rear cover fits even against the product chassis before you install the mounting screws.

6. There are two hinge pins (callout 1). Release the shorter left pin first, and then separate the rear cover and rear door assembly (callout 2) from the duplex-paper-feed assembly (callout 3).

Figure 1-28 Remove the rear cover, rear door, and feed assembly (3 of 3)

Cartridge door and front cover assembly

NOTE: The cartridge door assembly includes the cartridge door, Tray 1, and the front cover.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
2. Open the toner cartridge door and the rear jam access door.
3. Disconnect one connector (callout 1), and then disengage the cartridge-door assembly link arm (callout 3) by releasing two tabs in the pivot joint (callout 2).

TIP: The link arm releases the fuser-pressure lever when the cartridge door is opened.

Figure 1-29 Remove the cartridge door assembly and front cover (1 of 4)

4. Remove two screws (callout 1).

Figure 1-30 Remove the cartridge door assembly and front cover (2 of 4)

5. Pull the bottom of the assembly up in order to release two hooked tabs (callout 1), and then pull the assembly away from the product.

Figure 1-31 Remove the cartridge door assembly and front cover (3 of 4)

6. Release two hinge pins (callout 1), and then separate the front cover (callout 2) from the cartridge door assembly (callout 3).

Figure 1-32 Remove the cartridge door assembly and front cover (4 of 4)

Main assemblies

Laser scanner assembly

⚠ **WARNING!**  ESD sensitive component.

⚠ **CAUTION:** Do not bend or fold the flat flexible cables (FFCs) during removal or installation. Also, do not straighten pre-folds in the FFCs. You *must* make sure that all FFCs are fully seated in their connectors. Failure to fully seat an FFC into a connector can cause a short circuit in a PCA.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
 - Top cover assembly. See [Top cover on page 18](#).
2. Open the toner cartridge door and the rear jam access door.
3. On the top of the product, remove the antistatic foam pad and disconnect one connector (callout 1), and then disconnect the flat cable (callout 2).

Figure 1-33 Remove the laser scanner assembly (1 of 2)

4. Remove four screws (callout 1), and then remove the laser scanner assembly.

Figure 1-34 Remove the laser scanner assembly (2 of 2)

Registration assembly

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
 - Rear cover, rear door, and feed assembly. See [Rear cover, rear door, and feed assembly on page 20](#).
 - Top cover assembly. See [Top cover on page 18](#).
2. Open the toner cartridge door and the rear jam access door.

3. On the left side of the product, release one tab (callout 1), and then remove the gear.

Figure 1-35 Remove the registration assembly (1 of 3)

4. Inside the product chassis, on the formatter side, release two tabs (callout 1), and then lift up on the guide (callout 2) to release it and remove it from the product.

Figure 1-36 Remove the registration assembly (2 of 3)

5. Remove four screws (callout 1), and then remove the gear cover (callout 2).

Figure 1-37 Remove the registration assembly (3 of 3)

6. Slightly raise the right end of the assembly, and then slide it to the right and lift it up to release the assembly (callout 3) and remove it from the product.

 **Reinstallation tip** Insert the left end of the assembly first to reinstall the assembly.

Fuser assembly and paper feed guide

 **CAUTION:** The fuser might be hot. Allow enough time for the fuser to cool after the product power is turned off.

 **NOTE:** The toner cartridge door assembly should be in the closed position when the fuser is removed to make sure that the fuser-drive gear is correctly aligned for reinstallation.

1. Remove the following components:

- Tray 2 cassette
- Left cover. See [Left cover on page 13](#).
- Scanner assembly. See [Scanner assembly on page 13](#).
- Control panel. See [Control panel on page 15](#).
- Right cover. See [Right cover on page 17](#).
- Rear cover, rear door, and feed assembly. See [Rear cover, rear door, and feed assembly on page 20](#).

2. Open the rear jam access door

3. On the right side of the product, remove three gears (callout 1).

Figure 1-38 Remove the fuser (1 of 5)

4. Remove two screws (callout 1).

Figure 1-39 Remove the fuser (2 of 5)

5. At the rear of the product, disconnect six connectors (callout 1), and then pull the wire guide (callout 2) away from the product.

Figure 1-40 Remove the fuser (3 of 5)

 **NOTE:** You do not need to unroute the disconnected wires from the wire guide.

6. Remove one screw (callout 1), remove the media feed guide (callout 2), and unroute the wire (callout 3) at the corner of the engine controller assembly.

Figure 1-41 Remove the fuser (4 of 5)

7. Disconnect three connectors (callout 1), remove two screws (callout 2), and then remove the fuser (callout 3).

Figure 1-42 Remove the fuser (5 of 5)

Duplex drive assembly

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
 - Top cover assembly. See [Top cover on page 18](#).
2. Open the toner cartridge door and the rear jam access door.

3. On the right side of the product, remove the grounding spring (callout 1), disconnect five connectors (callout 2) from the connecting PCA, release two tabs (callout 3), and then remove the fan from the holder.

Figure 1-43 Remove the duplex drive assembly (1 of 4)

4. In the fan holder, remove one screw (callout 1), release one tab (callout 2), and then remove the holder from the product.

Figure 1-44 Remove the duplex drive assembly (2 of 4)

5. Remove two screws (callout 1), unroute the cables from the guides (callout 2), and then remove the fan cable guide.

Figure 1-45 Remove the duplex drive assembly (3 of 4)

6. Remove three screws (callout 1), and then pull the drive assembly (callout 2) away from the product.

Figure 1-46 Remove the duplex drive assembly (4 of 4)

CAUTION: Some of the gears and the solenoid arm are not captive. Do not lose the gears or the arm when you remove the assembly.

Solenoids

Tray 1 solenoid

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
2. Open the toner cartridge door and the rear jam access door.
3. On the left side of the product, disconnect one connector (callout 1), and then release the wires from the wire harness (callout 2).

Figure 1-47 Remove the Tray 1 pickup solenoid (1 of 2)

4. Remove one screw (callout 1), and then remove the Tray 1 pickup solenoid.

Figure 1-48 Remove the Tray 1 pickup solenoid (2 of 2)

Duplex solenoid

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
 - Rear cover, rear door, and duplex-paper-feed assembly. See [Rear cover, rear door, and feed assembly on page 20](#).
 - Top cover assembly. See [Top cover on page 18](#).
 - Fan. See [Fan on page 39](#).
 - Duplex drive assembly. See [Duplex drive assembly on page 31](#).
2. Open the toner cartridge door and the rear jam access door.

3. On the right side of the product, disconnect one connector (callout 1) from the connecting PCA, and then remove one screw (callout 2).

Figure 1-49 Remove the duplex solenoid

Motors and fans

Main motor

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
 - Rear cover, rear door, and duplex-paper-feed assembly. See [Rear cover, rear door, and feed assembly on page 20](#).
 - Top cover assembly. See [Top cover on page 18](#).
 - Fuser. See [Fuser assembly and paper feed guide on page 28](#).
 - Engine controller assembly. See [Engine controller assembly \(DC controller\) PCA on page 41](#).
2. Open the toner cartridge door and the rear jam access door.
3. At the rear of the product, release the cables (callout 1) from the cable guides (callout 2), and then pull out the paper feed assembly (callout 3).

Figure 1-50 Remove the main motor (1 of 4)

4. Release the cables (callout 1) from the cable guides (callout 2), remove one screw (callout 3), and then remove the cable guide (callout 4).

Figure 1-51 Remove the main motor (2 of 4)

5. Remove one screw (callout 1), remove the duct (callout 2), and then disconnect one connector (callout 3).

Figure 1-52 Remove the main motor (3 of 4)

6. Remove three black screws (callout 1) and one silver screw (callout 2), release two tabs (callout 3), and then remove the main motor (callout 4) and the cable guide (callout 5) together.

Figure 1-53 Remove the main motor (4 of 4)

 **Reinstallation tip** Remember the location from where you removed the silver screw. The silver screw needs to be reinstalled in the same place.

Fan

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
 - Top cover assembly. See [Top cover on page 18](#).
2. Open the toner cartridge door and the rear jam access door.

3. On the right side of the product, remove the grounding spring (callout 1), disconnect one connector (callout 2), release two tabs (callout 3), and then remove the main fan.

Figure 1-54 Remove the fan (1 of 2)

 **Reinstallation tip** When reassembling the main fan to the duct, make sure that the fan cable (callout 1) is positioned as shown in the figure below. Also, make sure that the label (callout 2) on the fan is facing inside.

Figure 1-55 Remove the fan (2 of 2)

Printed circuit-board assemblies (PCAs)

Engine controller assembly (DC controller) PCA

⚠ WARNING!  ESD sensitive component.

⚠ CAUTION: When removing the engine controller assembly (callout 1) from the rear of the product, the portion (callout 2) on the left side of the assembly might be hot. Allow enough time for the engine controller assembly to cool after the product power is turned off.

Figure 1-56 Allow the engine controller assembly to cool

1. Remove the following components:

- Tray 2 cassette
- Left cover. See [Left cover on page 13](#).
- Scanner assembly. See [Scanner assembly on page 13](#).
- Control panel. See [Control panel on page 15](#).
- Right cover. See [Right cover on page 17](#).
- Rear cover, rear door, and feed assembly. See [Rear cover, rear door, and feed assembly on page 20](#).
- Top cover assembly. See [Top cover on page 18](#).

2. At the rear of the product, disconnect six connectors (callout 1).

Figure 1-57 Remove the engine controller assembly (1 of 9)

3. Remove one screw (callout 1), and then remove the paper feed guide (callout 2).

Figure 1-58 Remove the engine controller assembly (2 of 9)

4. Disconnect seven connectors (callout 1).

Figure 1-59 Remove the engine controller assembly (3 of 9)

5. Release the cables (callout 1) from the cable guides (callout 2).

Figure 1-60 Remove the engine controller assembly (4 of 9)

6. On the right side of the product, remove one screw (callout 1).

Figure 1-61 Remove the engine controller assembly (5 of 9)

7. On the left side of the product, disconnect the two cartridge-door interlock switch connectors (callout 1), release the cables (callout 2) from the cable guide (callout 3), and then disconnect one connector (callout 4) and one flat cable (callout 5) on the formatter PCA.

 **NOTE:** Place a mark on one of the cartridge-door interlock switch wires before you disconnect them, so that you can reconnect the connectors to the same switch lugs.

Figure 1-62 Remove the engine controller assembly (6 of 9)

8. Remove three screws (callout 1).

Figure 1-63 Remove the engine controller assembly (7 of 9)

9. On both sides of the product, use a small flat blade screwdriver to release the sheet-metal tabs (callout 1) in the product chassis to lower the engine controller assembly PCA (callout 2).

 **NOTE:** It might be easier to release the right side tab from inside the chassis.

 **CAUTION:** Carefully push the tab toward the outside of the product to release it. Do not bend the tab so much that it will not engage the mounting bracket when the engine controller assembly is reinstalled.

Figure 1-64 Remove the engine controller assembly (8 of 9)

10. Pull the cable (callout 1) and the flat cable (callout 2) into the product chassis, and then carefully slide the engine controller assembly (callout 3) out of the product.

Figure 1-65 Remove the engine controller assembly (9 of 9)

Universal serial bus (USB) PCA

NOTE: This section applies to walkup USB-equipped models only.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).

2. On the left side of the product, remove two screws (callout 1) on the USB PCA, and then pull the PCA away from the product.

Figure 1-66 Remove the USB PCA (1 of 2)

3. Disconnect the connector (callout 1) on the back of the PCA.

Figure 1-67 Remove the USB PCA (2 of 2)

Formatter PCA

 **WARNING!**  ESD sensitive component.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Wireless PCA (wireless models only). See [Wireless PCA on page 48](#).
2. On the left side of the product, disconnect any connectors and flat cables (callout 1) on the formatter, and then remove six screws (callout 2).

Figure 1-68 Remove the formatter

Wireless PCA

 **NOTE:** This section applies to wireless models only.

The wireless PCA is located at the top of the formatter PCA.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).

2. On the left side of the product, pull the lower left-hand corner of the PCA (callout 1) to disconnect the connector on the back of the PCA, and then pull the PCA away from the product.

Figure 1-69 Remove the wireless PCA

Fax PCA

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
2. Disconnect one flat flexible cable (callout 1) from the fax PCA, and then remove four screws (callout 2) to remove the PCA from the product.

Figure 1-70 Remove the fax PCA

Power switch PCA

The power switch PCA is located in the product front cover.

1. Remove the following components:

- Tray 2 cassette
- Left cover. See [Left cover on page 13](#).
- Scanner assembly. See [Scanner assembly on page 13](#).
- Control panel. See [Control panel on page 15](#).
- Right cover. See [Right cover on page 17](#).
- Cartridge door and front cover assembly. See [Cartridge door and front cover assembly on page 22](#).

2. On the back of the front cover, use a small flat-blade screwdriver to release two tabs (callout 1) to separate the two pieces of the cover.

Figure 1-71 Remove the power-switch PCA (1 of 3)

3. Release two tabs (callout 1) to remove the PCA shield.

Figure 1-72 Remove the power-switch PCA (2 of 3)

4. Release one tab (callout 1), and then pull the PCA out of the front cover.

Figure 1-73 Remove the power-switch PCA (3 of 3)

Connecting PCA

The connecting PCA is located on the product right side, below the control panel.

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).

- Scanner assembly. See [Scanner assembly on page 13](#).
 - Control panel. See [Control panel on page 15](#).
 - Right cover. See [Right cover on page 17](#).
2. On the right side of the product, disconnect any connectors (callout 1) on the PCA, remove one screw (callout 2), and then remove the connecting PCA.

Figure 1-74 Remove the connecting PCA

Miscellaneous parts

Transfer roller

CAUTION: Do not touch the sponge surface of the roller unless you are replacing the roller. Skin oils on the roller can cause print-quality problems.

Always wear latex gloves when handling a transfer roller for reinstallation or replacement.

1. Open the toner cartridge door, and then remove the toner cartridge.

2. In the toner cartridge cavity, pull the sheet-metal jam plate toward the Tray 1 pickup roller cover (callout 1) and hold it, release the two tabs of the black locking clip on the right-side bushing (callout 2), pull the bushing up, and then slide the transfer roller (callout 3) to the right and remove it.

Figure 1-75 Remove the transfer roller

CAUTION: The black locking clip on the right side of the transfer-roller shaft is not captive. Do not lose the locking clip when you remove the transfer roller.

Multipurpose (MP) tray pickup gear assembly

NOTE: The multipurpose tray is referred to as Tray 1 in user documentation.

1. Remove the following components.
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).

2. On the left side of the product, release the tab (callout 1) at the center of the gear, and then remove the gear (callout 2).

Figure 1-76 Remove the paper-pickup-gear assembly

 **Reinstallation tip** Press and hold back the gear arm (callout 3) when reinstalling the pickup gear.

Document feeder assembly

1. Remove the following components:
 - Tray 2 cassette
 - Left cover. See [Left cover on page 13](#).
 - Scanner assembly. See [Scanner assembly on page 13](#).

2. On the underside of the scanner assembly, remove two T-8 torx screws (callout 1), and then remove the cable cover (callout 2).

Figure 1-77 Remove the document feeder (1 of 2)

3. Thread the cables back up through the scanner bed, and then use a small flat-blade screwdriver to release the tabs (callout 1) at the front of the document feeder assembly hinges to remove the assembly from the scanner bed.

Figure 1-78 Remove the document feeder (2 of 2)

Optional paper feeder (Tray 3)

When replacing any parts on the optional paper feeder (Tray 3), remove the tray cassette before removing any other parts.

NOTE: To view the procedures for removing the optional paper feeder pickup roller or separation pad, see [Rollers on page 6](#).

Optional paper feeder right cover

- ▲ Starting at the back of the unit, release six tabs (callout 1), and then slide the right cover toward the front of the unit to remove it.

Figure 1-79 Remove the optional paper feeder right cover

Optional paper feeder driver PCA

1. Remove the right cover.

2. On the right side of the unit, remove one screw (callout 1), release one tab (callout 2) from the driver PCA cover (callout 3), and then slide the PCA cover to the right to remove it.

Figure 1-80 Remove the optional paper feeder driver PCA (1 of 2)

3. Disconnect three connectors (callout 1), and then remove one screw (callout 2) to remove the driver PCA.

Figure 1-81 Remove the optional paper feeder driver PCA (2 of 2)

Optional paper feeder paper sensor PCA

1. Remove the right cover.

2. On the right side of the unit, remove one screw (callout 1), release one tab (callout 2) from the driver PCA cover (callout 3), and then slide the PCA cover to the right to remove it.

Figure 1-82 Remove the optional paper feeder paper sensor PCA (1 of 3)

3. On the driver PCA, disconnect one connector (callout 1).

Figure 1-83 Remove the optional paper feeder paper sensor PCA (2 of 4)

4. At the front of the paper feeder, remove two screws (callout 1), remove the two plastic posts (callout 2), and then lift the metal cover (callout 3) off the paper feeder.

Figure 1-84 Remove the optional paper feeder paper sensor PCA (3 of 4)

5. Remove one screw (callout 1), and then release the PCA cable from the cable guides (callout 2) to remove the sensor PCA.

Figure 1-85 Remove the optional paper feeder paper sensor PCA (4 of 4)

2 Parts and diagrams

How to use the parts lists and diagrams

The figures in this chapter show the major subassemblies in the product and their component parts. A parts list table follows each exploded view assembly diagram. Each table lists the item number, the associated part number, and the description of each part. If a part is not listed in the table, then it is not a field replacement unit (FRU).

 **CAUTION:** Be sure to order the correct part. When looking for part numbers for electrical components, pay careful attention to the voltage that is listed in the description column. Doing so will ensure that the part number selected is for the correct product model.

 **NOTE:** In this manual, the abbreviation “PCA” stands for “printed circuit-board assembly.” Components described as a PCA might consist of a single circuit board or a circuit board plus other parts, such as cables and sensors.

Assembly locations

Main unit

Figure 2-1 Assembly locations: main unit

Alphabetical parts list

Table 2-18 Alphabetical parts list

Description	Part number	Table and page
Bushing	RC2-8263-000CN	Internal components (2 of 5) on page 73
Bushing	RC2-6131-000CN	Internal components (2 of 5) on page 73
Cable, flexible, flat	RK2-4452-000CN	Internal components (3 of 5) on page 75
Cartridge door assembly	RM1-9307-000CN	Covers, panels, and doors on page 69
Cassette assembly (Tray 2)	RM1-9137-000CN	Internal components (4 of 5) on page 77
Connecting PCA	RM1-9114-000CN	Internal components (4 of 5) on page 77
Connecting PCA	RM1-9114-000CN	PCA locations on page 81
Control-panel assembly (HP LaserJet M425dn model)	CF286-60601	Covers, panels, and doors on page 69
Control-panel assembly (HP LaserJet M425dw model)	CF288-60602	Covers, panels, and doors on page 69
Cover, inner, front	RC3-2532-000CN	Covers, panels, and doors on page 69
Cover, left	RM1-9305-000CN	Covers, panels, and doors on page 69
Cover, left	RC3-2618-000CN	Paper feeder covers on page 85
Cover, outer, front	RC3-2533-000CN	Covers, panels, and doors on page 69
Cover, rear	RM1-9161-000CN	Covers, panels, and doors on page 69
Cover, rear	RC3-2621-000CN	Paper feeder covers on page 85
Cover, right	RM1-9304-000CN	Covers, panels, and doors on page 69
Cover, right	RM1-9316-000CN	Paper feeder covers on page 85
Cover, top	RM1-9303-000CN	Covers, panels, and doors on page 69
Document feeder assembly	CF288-60011	Scanner and document feeder on page 83

Table 2-18 Alphabetical parts list (continued)

Description	Part number	Table and page
Document feeder pickup roller	CF288-60015	Scanner and document feeder on page 83
Document feeder separation pad	CF288-60021	Scanner and document feeder on page 83
Document feeder separation roller	CF288-60016	Scanner and document feeder on page 83
Duplexing paper feed assembly	RM1-9153-000CN	Internal components (5 of 5) on page 79
Engine controller assembly (DC controller) PCA — 110V	RM1-9308-000CN	PCA locations on page 81
Engine controller assembly (DC controller) PCA — 220V	RM1-9309-000CN	PCA locations on page 81
Engine controller assembly (DC controller) — 110V	RM1-9308-000CN	Internal components (5 of 5) on page 79
Engine controller assembly (DC controller) — 220V	RM1-9309-000CN	Internal components (5 of 5) on page 79
Fan	RK2-2276-000CN	Internal components (4 of 5) on page 77
Fax PCA (all countries/regions except Europe)	CF206-60001	PCA locations on page 81
Fax PCA (Europe)	CF207-60001	PCA locations on page 81
Formatter PCA	CF229-60001	PCA locations on page 81
Formatter PCA (China only)	CF229-69001	PCA locations on page 81
Fuser (110V)	RM1-8808-000CN	Internal components (1 of 5) on page 71
Fuser (220V)	RM1-8809-000CN	Internal components (1 of 5) on page 71
Laser scanner assembly	RM1-9135-000CN	Internal components (3 of 5) on page 75
Lever, power supply button	RC3-2545-000CN	Covers, panels, and doors on page 69
Main motor assembly	RM1-9042-000CN	Internal components (2 of 5) on page 73
Multipurpose tray pickup gear assembly	RM1-9127-000CN	Internal components (4 of 5) on page 77
Paper feed guide assembly	RM1-9122-000CN	Internal components (3 of 5) on page 75
Paper feeder 500-sheet cassette (Tray 3)	RM1-9313-000CN	Paper feeder main body (2 of 2) on page 89
Paper feeder driver PCA	RM1-9297-000CN	Paper feeder main body (2 of 2) on page 89

Table 2-18 Alphabetical parts list (continued)

Description	Part number	Table and page
Paper feeder paper sensor PCA	RM1-1267-000CN	Paper feeder main body (2 of 2) on page 89
Paper feeder pickup roller assembly	RM1-9168-000CN	Paper feeder main body (2 of 2) on page 89
Paper feeder separation pad holder assembly	RM1-6303-000CN	Paper feeder main body (2 of 2) on page 89
Paper pickup gear assembly	RM1-7360-000CN	Internal components (2 of 5) on page 73
Paper pickup gear assembly	RM1-7360-000CN	Paper feeder main body (1 of 2) on page 87
Paper pickup roller assembly	RM1-9168-000CN	Internal components (2 of 5) on page 73
Pickup roller, multipurpose tray (Tray 1)	RL1-3307-000CN	Internal components (4 of 5) on page 77
Power button PCA	RM1-9039-000CN	Covers, panels, and doors on page 69
Power switch PCA	RM1-9039-000CN	PCA locations on page 81
Registration roller assembly	RM1-8806-000CN	Internal components (3 of 5) on page 75
Reverse drive assembly	RM1-9157-000CN	Internal components (5 of 5) on page 79
Scanner assembly	CF288-60104	Scanner and document feeder on page 83
Sensor assembly	RM1-8807-000CN	Internal components (3 of 5) on page 75
Separation pad holder assembly, Tray 2	RM1-7365-000CN	Internal components (4 of 5) on page 77
Separation pad, multipurpose tray	RL1-2115-000CN	Internal components (2 of 5) on page 73
Solenoid	RK2-0426-000CN	Paper feeder main body (1 of 2) on page 87
Solenoid, duplex	RK2-2733-000CN	Internal components (5 of 5) on page 79
Solenoid, Tray 1	RK2-2731-000CN	Internal components (4 of 5) on page 77
Switch, power button assembly	RM1-9125-000CN	Covers, panels, and doors on page 69
Transfer roller assembly	RM1-9175-000CN	Internal components (3 of 5) on page 75
Universal serial bus (USB) PCA	CF368-60001	PCA locations on page 81

Table 2-18 Alphabetical parts list (continued)

Description	Part number	Table and page
Wireless PCA (HP LaserJet M425dw model only)	CF1150-7940	PCA locations on page 81
Wireless PCA holder (not pictured)	CF286-40014	PCA locations on page 81

Numerical parts list

Table 2-19 Numerical parts list

Part number	Description	Table and page
CF1150-7940	Wireless PCA (HP LaserJet M425dw model only)	PCA locations on page 81
CF206-60001	Fax PCA (all countries/regions except Europe)	PCA locations on page 81
CF207-60001	Fax PCA (Europe)	PCA locations on page 81
CF229-60001	Formatter PCA	PCA locations on page 81
